

ARCTIC SUPERFLEX BLUE™ has been tested and successfully used for more than a decade in the harsh Alaskan environment. Flexibility is achieved by combining finely stranded copper construction with a jacket resistant to the abuses of oil, gasoline, salt water, acids and chemicals. Arctic Superflex cables are highly abrasion resistant and can be used in most 600 volt applications.

Thermoplastic Elastomer Jacket

- Same jacket as **ARCTIC ULTRAFLEX BLUE™**
- Cold weather flexibility to -67F° (-55°C)
- High temperature performance to 221F° (105°C)
- Chemical, abrasion, and water resistant
- Polarity stripe extruded into jacket

Copper Stranding

- Manufactured to same UL/AWG specifications as **ARCTIC ULTRAFLEX BLUE™**

Applications

- Battery and Jumper Cables
- Wind and Solar power generators
- Uninterrupted Power Supply Systems (UPS)
- Most industrial power connections

Size and Colors

- Available 8 AWG through 1/0 AWG
- Other sizes available on request
- Custom colors and striping available

ARCTIC SUPERFLEX BLUE™

Part Number	AWG
ASF-8X2	8
ASF-6X2	6
ASF-4X2	4
ASF-2X2	2
ASF-1/0X2	1/0
