

Eye-to-Eye Cables

Solar Panel Interconnection Cables

CUSTOM AND PREBUILT CABLES

Eye-to-Eye Cables

Eye-to-Eye Cables are commonly used for **grounds, starters, inverters, and batteries.** Our eye-to-eye cables are built with Polar Wire's premium **Arctic Ultraflex Blue®** cable for superior flexibility and unbeatable performance. We fit our cables with heavy duty 3/8" tin-plated copper eyelet lugs (see specs on page 52) in negative-to-negative, positive-to-positive, and series (negative-to-positive) configurations, and seal with heat shrink for added durability and protection.

Standard color configurations

- Negative:** Blue cable, black heat shrink on both ends
(Black cable, white heat shrink available on request)
- Positive:** Blue cable, red heat shrink on both ends
- Series:** Blue cable, red heat shrink on one end, black on the other
