

Polar Wire Premium Multi-Conductor Boat Cable

ORDER ONLINE

Polar Wire's UL Listed E321438 marine grade multi-conductor **Boat Cable** is designed for best performance and maximum corrosion protection in harsh marine environments. The round design and ultra-flexible tinned Class K copper stranding provides ease of installation and resists vibration fatigue. Polar Wire's exclusive boat cable is rated at 600 volts, 105°C dry and 75°C wet, and is resistant to salt water, oil, gasoline, sunlight, heat, and abrasion.

- Ultra-flexible Class K copper stranding resists fatigue from vibration and flexing
- Tinned for maximum protection against corrosion and electrolysis
- Round design for easy handling and installation
- Jacket stays ultra flexible in extreme cold and resists saltwater, oil, gasoline, heat and sunlight
- Rated 600 Volts for temps up to 221°F (105°C) dry, 167°F (75°C) wet
